Cancellation of September 13, 2018 NIAC Quarterly Business Meeting

Dear NIAC Community Stakeholders,

The President's National Infrastructure Advisory Council (NIAC) is currently conducting a study on how the public and private sectors can work together to enhance and integrate critical infrastructure resilience with response and recovery actions to mitigate risks posed by catastrophic power outages.

We planned to provide an update on the study during a public Quarterly Business Meeting scheduled for Thursday, September 13, 2018. Unfortunately, we need to cancel the meeting due to the travel and weather impacts expected from Hurricane Florence.

We apologize for any inconvenience. The presentation we planned to give during the meeting is posted on our website and provides some of our early observations at this point in the study and our path forward. Stakeholders who planned to attend the meeting are welcome to provide comments via email to: niac.niac@hq.dhs.gov.

We are scheduled to host our next public meeting on Thursday, December 13, 2018 to present the final results of our study. Additional details will be published in the Federal Register and on the NIAC website later this fall. We hope that you will be able to attend or join us by webcast.

On behalf of the NIAC, we thank you for your willingness to contribute to the development of this important study. Please contact the NIAC Designated Federal Officer Ginger Norris at ginger.norris@hq.dhs.gov if you have any questions

Sincerely,

Constance Lau
