PTS Dialer
Getting Started
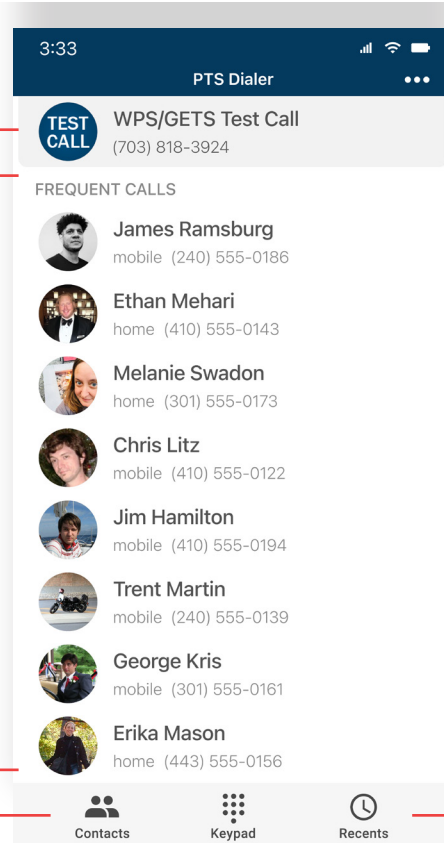

APP VERSION: 2.3
DOCUMENT VERSION: 2.0

Overview of the PTS Dialer

WPS/GETS Test Call feature to initiate Test Calls

Access the overflow menu items, including:
Settings
Help
Privacy
About

Lists the destination of the most **Frequent Calls** from the PTS Dialer

Displays the phone's **Contacts**

Recents displays a list of the most recent PTS Dialer outbound calls.

Use the **Keypad** to dial any number

When using the PTS Dialer, WPS calls will work automatically on any phone that is WPS enabled. In order to make GETS calls, you will need to enter your GETS PIN in Settings.

To Place a Call:

1. Enter the destination number using the **Keypad**, or choose a number from **Contacts**.
2. On the following screen, select WPS, WPS + GETS, or GETS to initiate the call.
   - If using an iPhone, you will need to tap Call after choosing the service.

Additional information, including troubleshooting for the PTS Dialer can be found in the PTS Dialer User Manual located at https://gwids.cisa.gov/apps
For questions or problems, contact 24-hour User Assistance at 800-818-4387 or support@gwids.cisa.gov
