Campaign

1. October is #CybersecurityAwarenessMonth! There are a lot of different ways that you can stay safe online. Learn more about what you can do to help #SecureOurWorld.
2. Happy #CybersecurityAwarenessMonth! What steps have you taken so far to stay safe online and #SecureOurWorld? Check those boxes off your list and find more resources here.
3. Phishing attempt? Reported. Software? Updated. Multifactor authentication? Turned on. Passwords? Strong and in a vault. We're ready for #CybersecurityAwarenessMonth! #SecureOurWorld
4. It's that time of year again to help grandma update her router and let your Facebook friends know not to accept the request from your buddy's "new" profile. Learn more about #CybersecurityAwarenessMonth and how you can #SecureOurWorld.
5. Have you talked with your #family about being safe online? #Cyberattacks are on the rise so have a conversation with your kids, parents and community about how to stay safe when online and #SecureOurWorld. #elderfraud #identifytheft #phishing

Cybersecurity

6. Cybersecurity means "hands off my stuff!" Learn more about why it's important to keep your things yours: (link) #CybersecurityAwarenessMonth #SecureOurWorld
7. In the technology age, cybersecurity has never been more important. While this may seem obvious, some of the cracks in your armor might not be. Take the opportunity this #CybersecurityAwarenessMonth to double check your digital protections. #SecureOurWorld
8. In an increasingly digital world, it's important to keep cybersecurity top-of-mind. Stay safe online and help #SecureOurWorld this #CybersecurityAwarenessMonth.

9. As AI gets more sophisticated and deepfakes get more realistic, we have to be smarter about cybersecurity. Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld
10. Let's #SecureOurWorld during #CybersecurityAwarenessMonth and protect older family members by discussing online safety. Tell family members it's ok to ask if an email or text or call is real. No legitimate organization asks for personal information over an email text or phone call. #phishing

Multifactor Authentication

11. One of the easiest things you'll do today is turn on multifactor authentication (MFA). Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld
12. Your password may be strong, but your password + multi-factor authentication is stronger. Learn more here: (link) #CybersecurityAwarenessMonth #SecureOurWorld
13. When you enable MFA, you disable the hackers. Even quick solutions like multi-factor authentication is a strong defense. #CybersecurityAwarenessMonth #SecureOurWorld

Passwords/Password Managers

14. Using the same password for everything might be easy to remember, but it's also easy to hack. Storing multiple passwords in one password manager is stronger and more secure. Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld
15. Make the one password you have to remember the password to your vault. Store hundreds of different passwords in a password manager and make it easy on yourself! Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld
16. Making 50 copies of your house key is probably overkill. Using the same password 50 times is also a bad idea. Use passwords that are strong, long, unique, and random for each site or account. That is the best way to keep your accounts secure. Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld

Software Updates

17. Let software updates do the heavy lifting for you. It's that easy - by keeping your technology up-to-date, you're getting the best security available! Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld
18. When you turn on automatic updates right from your device, you don't have to worry about getting the latest and greatest security. Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld

19. Out with the old, in with the new! Keeping your software updated ensures you're getting the best security available. Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld

Phishing

20. There's something so satisfying about blocking, deleting, and reporting a phish. When you see one, give it a try! Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld

21. Some species of phish are easy to spot, while others have great camouflage. Stay vigilant by recognizing the signs. Learn more: (link) #CybersecurityAwarenessMonth #SecureOurWorld

22. Hackers use convincing bait to try to get you hooked. Don't fall for it! Learn how to recognize a phish and what to do with it: (link) #CybersecurityAwarenessMonth #SecureOurWorld
