FOR CISA's
**INFRASTRUCTURE RESILIENCE
PLANNING FRAMEWORK**

CALLING ALL PLANNERS

If critical infrastructure needs to be part of your organization's plans to remain open during—or recover quickly from—an incident, be sure to check out CISA's free Infrastructure Resilience Planning Framework (IRPF) Playbook. This Playbook is a companion to the main IRPF and can help you understand your risk picture and how to plan for it. This Playbook uses the infrastructure resilience planning fundamentals found within the IRPF and provides step-by-step instruction on how to plan for resilience within your community.

Access the IRPF and
the IRPF Playbook:

THE PLAYBOOK

Is intended for any critical infrastructure stakeholders involved in resilience planning, including State, Local, Tribal, Territorial, and other public or private partners.

Uses a recipe-style list of inputs, actions and outcomes, as well as fictional scenarios that enable users to better understand how best to implement IRPF guidance.

Walks through the IRPF's five steps and core principles to help users contemplate infrastructure resilience objectives and incorporate elements of the IRPF into their planning activities.
